

# NeuroAGARIC™

AMANITA MUSCARIA & PANTHERINA

**NeuroAGARIC™** is a therapeutic blend of concentrated extracts of Amanita Muscaria & Amanita Pantherina. The extraction process uses no alcohol or solvents, is water-based, utilizing ultrasonication to break the cell walls of the Amanita mushroom caps, then heating (decarboxylation - Ibotenic Acid (C<sub>5</sub>H<sub>6</sub>N<sub>2</sub>O<sub>4</sub>) requires one less carbon atom and two fewer oxygen atoms to become Muscimol (C<sub>4</sub>H<sub>6</sub>N<sub>2</sub>O<sub>2</sub>), releasing Muscimol & reducing Ibotenic Acid from the Amanita tissue. The extract is then concentrated to achieve desired Muscimol levels.

**NeuroAGARIC™ COMPOUND NA001.1** - Amanita Muscaria & Amanita Pantherina concentrated extract with at least 65 mg per gram of Muscimol & +/- 0 Ibotenic Acid.

**PRIMARY INDICATIONS:** Anxiety & Sleep

**PROTOCOL:** Microdose As Needed

**DELIVERY FORMAT:** Dried Crystalline Powder - 100% Water Soluble

**DOSING:** 5-10mg Muscimol Depending On Delivery Format/ Dilution

**SCHEDULE:** Pre-Clinical Trials Q1 2024

**NeuroAGARIC™**
