

## Thank You For Ordering Your Amanita Tincture!

Our Amanita product is quite strong (made with our proprietary NeuroAGARIC™ blend of (Amanita Muscaria, Pantherina, Muscimol), so please start out slow - we recommend a ¼ dropper in the AM (under your tongue) to help calm any stress or anxiety. As needed, add ¼ dropper at a time until you find your perfect dose.

For nighttime use to support a restful night's sleep, you may try a single ½ dropper (under your tongue) - some customers use more for a full 8+ hours of deep sleep. Much depends on your height, weight, metabolism, etc. Always go ***slow!***

\*Remember that Amanita (Muscimol) does interact with your GABA receptors, so you want to always **take a few days off per week** like any microdosing schedule - this allows your body to fully “reset”.

Feel free to reach out with any questions, and ***always*** check in with your healthcare provider with questions on drug interactions or health concerns.
